

# Instructions for Bag-in-Box:

Store carton upright in a dry location.

When unopened, juice is stable for at least 12 months.

To use, remove freshness seal on the valve (red tab), place thumb on the round hammer. Place two fingers on the side tabs and pull up.

After the valve has been opened for the first time, juice will remain consumable for up to 3 months, provided however, that the package is not placed upright, shaken or moved.

Keep the back/base of the box elevated at least 5 cm as shown in picture to the right. This will ensure that no air enters the bag.

Rinse bag and dispose/recycle.

The cardboard box is reusable; just bring it with you the next time you buy juice. Recycle the carton if you choose not to reuse it.
